P.M.

Sir:

Please amend the above-identified application as follows:

IN THE CLAIMS

D/

63. (Three Times Amended) A method for automatically
starting up a process in a host device based on insertion of a
storage media into peripheral, comprising:

booting an operating system of the host device, said step
 of booting including checking for an initialization file;

automatically enabling an interrupt;

automatically checking for a file other than said
initialization file in a removable storage media associated
with said at least one peripheral on occurrence of said
 interrupt, said removable storage media being encoded with
 electronic content including said file; [and]

automatically loading at least a portion of the electronic
 content from said removable storage media in response to
 finding said file during said step of automatically checking;
 and

automatically executing an application identified by or
associated with said file.
